### FAL-IM-120

This single 20" unit incorporates a specially designed carbon block that also provides sediment filtration and the best media available for scale control. Use on ice machines, cappuccino and coffee makers.

Included: 3/8" FNPT inlet & outlet & gauge

Capacity: 500 lb cubers, 1000 lb flakers

Replacement Filter: FAL-IM-120RF

### FAL-IM-300

Triple stage – Stage #1 is a 10" 5 micron pre-filter utilizing a clear canister that allows for visual inspection.

Stage #2 is a 10" carbon block filter.

Stage #3 is a 10" dedicated scale control cartridge.

Included: 3/8" FNPT inlet & outlet & gauge

Capacity: 1,000 lb cubers, 1500 lb flakers

Replacement Filter Kit: FAL-IM-300RFK

### FAL-IM-200

Dual Stage:

Stage #1 is a 10" 5 micron pre-filter utilizing a clear canister that allows for visual inspection.

Stage #2 is a 10" carbon block with scale control.

Included: 3/8" FNPT inlet & outlet & gauge

Capacity: 350 lb cubers, 500 lb flakers

Replacement Filter Kit: FAL-IM-200RFK

### FAL-IM-345

Triple Stage:

Stage #1 is a 20" 5 micron pre-filter.

Stage #2 is a 20" carbon block filter.

Stage #3 is a 10" dedicated scale control cartridge.

Included: 1/2" FNPT inlet & outlet & gauge

Capacity: 1500 lb cubers, 1800 lb flakers

Replacement Filter Kit: FAL-IM-345RFK

### FAL-IM-220

Dual Stage:

Stage #1 is a 10" 5 micron pre-filter utilizing a clear canister that allows for visual inspection.

Stage #2 is a 20" carbon block with scale control.

Included: 3/8" FNPT inlet & outlet & gauge

Capacity: 500 lb cubers, 1000 lb flakers

Replacement Filter Kit: FAL-IM-220RFK

### FAL-IM-360

Triple Stage :

Stage #1 is a 20" 5 micron pre-filter.

Stage #2 is a 20" carbon block filters.

Stage #3 is a 20" carbon block with scale control.

Included: 1/2" FNPT inlet & outlet & gauge

Capacity: 2000 lb cubers, 2000 lb flakers

Replacement Filter Kit: FAL-IM-360RFK
