

Platinum Hybrid Softener

The Platinum Hybrid
*It's intuitive. It's versatile.
It's mighty.*

At only 45" tall with a flow rate up to 21 gpm and a volume of 1.5 cubic feet, the Platinum Hybrid is the largest capacity softener with the smallest footprint of its kind.

Its 7" color LCD touchscreen display provides both real-time and historical diagnostics, ensuring the unit is always operating at its maximum performance level.

This cabinet softener utilizes the latest technology in optical sensors for precise valve movement, resulting in minimal water and salt usage.

Though ultra compact in design, its holding tank can store enough salt to provide months of soft water, making the Platinum Hybrid the most sophisticated and efficient cabinet softener on the market today.

KEY FEATURES

SOPHISTICATED

Fully programmable 7" LCD touchscreen display

EFFICIENT

21 gpm — requires less salt, water and maintenance

MODERN

Sliding cover, tapered chute, flip-up access window, aesthetically pleasing neutral tone compliments any décor

MIGHTY

Compact design can service up to a 4 bathroom home

WATER SYSTEMS, INC.
Quality Water Treatment Equipment

Platinum Hybrid Series
Water Softener

FAL-5800WS-CAB-1.5

Applications:

Up to 4 bathrooms and a 1" feed

Accessories Included

Bypass Assembly

3/4" and 1" Connectors

90° Adapter

3/4" x 1" x 18" Stainless Steel Flex Lines

Platinum Hybrid Softener

Specifications

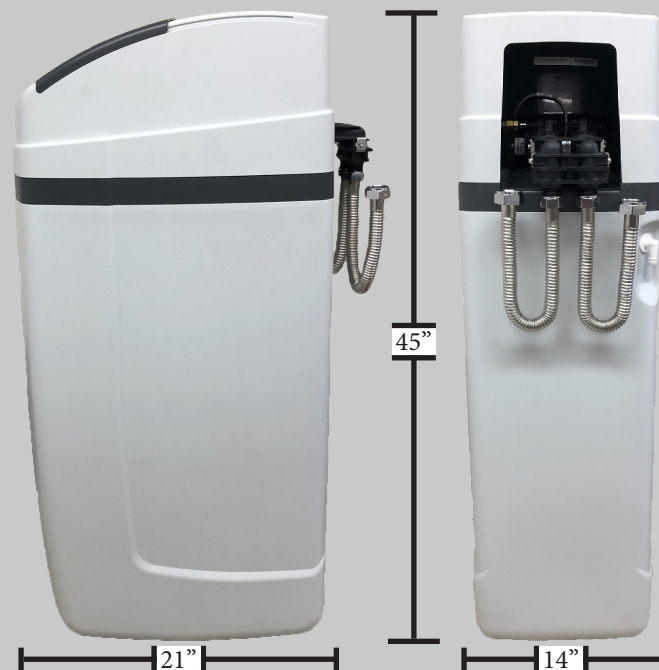

- Maximum Flow Rate: 21 gpm
- Power Supply: Constant 110v
- Drain Line Adapters: 1/2" FPT & 1/2" barb fitting (tubing not included)
- Main Line Adapters: 3/4" and 1" MPT
- Includes: Stainless steel flex lines, bypass and 90° adapter

Features

- Top sliding cover opens to tapered chute for ease of adding salt to the system
- Internal flip-up window allows access to the valve without removing the cover
- Regeneration occurs based on exact gallons, reducing the amount of salt and water used
- Touchscreen digital display indicates exact time of day and gallons remaining until next regeneration
- Backlit circuit board for easy viewing, even in dark areas
- Automatically filters out dirt and sediment (no additional filtration required)
- Vacation mode saves water when not in use
- Included accessories allow for tighter installations

Diagnostics

- Current flow rate
- Peak flow rate
- Totalizer
- Last regeneration
- Last program change
- Number of regenerations
- Regeneration interval
- Usage since last regeneration
- 4 weeks of daily usage data
- Downloadable diagnostic data
