

Twin Tank Analyzer

The Most Efficient Water Softening System on the Market

"Quality Water Treatment Equipment"

Patented Advanced Sensor Technology

- This patented technology calculates the true capacity and adjusts to fluctuations in the water hardness.
- Twenty-four hours a day and seven days a week, two sets of sophisticated electronic sensors report on water conditions in a 9100TS. This continuous monitoring delivers two big benefits:
Full Efficiency - the system delivers 100% of it's conditioning capacity before it regenerates, saving both water and regenerant.
Smooth consistency - the system never leaves home water unconditioned, and never makes homeowners wait while a conditioning cycle completes.

Say Goodbye to Harsh, Unconditioned Water

- Unsightly stains on sinks, tubs, tile and fixtures
- Dull Glass from Hard water etching
- Scaly deposits that shorten the life of water heaters and water-using appliances
- Scratchy towels and damage to fabrics
- Weak lather and poor rinsing of soaps and detergents
- Residue on your skin and in your hair
- The need to use more soap, shampoo or detergent to feel clean
- Hours spent scrubbing tubs, tile and fixtures

Shown with optional stainless steel jackets.

FAL-TTWS-1.0

1 to 2 bathrooms
8" Round, 52" Tall
3/4" Service

FAL-TTWS-1.25

2 to 3 bathrooms
9" Round, 56" Tall
1" Service

FAL-TTWS-1.75

3 to 4 bathrooms
10" Round, 62" Tall
1" Service

FAL-TTWS-2.25

3 to 5 bathrooms
12" Round, 56" Tall
1" to 1-1/4" Service
