

FALSKEN WATER SYSTEMS, INC.

ALKALINE REVERSE OSMOSIS SYSTEM

FAL-RO5-35ALK

- Falsken's new alkaline under the sink reverse osmosis system is a convenient and economical way to provide alkaline bottle quality water for your family.
- Unique dual pass design allows for better quality alkaline water to be created.
- A yearly filter replacement is all that is required for these units to provide quality drinking water for years to come.

- Each unit produces 35 gallons of quality alkaline drinking water per day
(Higher daily production membranes available)
- Quality components for efficiency and durability
- Quick connect fittings for easier, faster and professional installation
 - Completely assembled and ready to install
- Included with each installation kit: Chrome long reach faucet, 3.2 gallon tank, tank valve, feed valve, tubing, drain adapter, and instructions
 - All components are CA AB1953 compliant

Replacement Filter Pack:	FAL-RO5-35ALKFP
Replacement Membrane:	FAL-RO35MB

WARNING: Do not use with water that is microbiologically unsafe, or of unknown quality without adequate disinfection before or after the system.

NOTE: The contaminants or substances removed or reduced by this water treatment device are not necessarily in your water.

NOTE: Performance depends on system design, flow rate and other conditions.

NOTE: Install in accordance with local codes
